A.) The Top Must-Have Plants for Your Landscape

Pamela J. Bennett, Associate Professor, OSUE MGVP Program Director

Pam takes you on a fast-paced tour through the annual, perennial, shrub, and tree world looking at plants that are great performers in the landscape.

D.) Landscaping for Lake Erie

Natalie Gertz-Young, Education/Information Coordinator, Lake County Soil and Water Conservation District

Traditional "grass-focused" lawn care practices are time, energy, fossil fuel, water, fertilizer, and pesticide dependent. Topics include soil tests, proper fertilizer use, grass types, proper mowing and watering, weed and pest controls, invasive plant removal, and native plant selection.

G.) Victory or Vexing — How Does Your Garden Grow?

Eric Draper, Geauga County Ohio State University Extension, Commercial Horticulture

Find out the best ways to make your vegetable gardening successful. We'll discuss how to improve your vegetable selection process, yields, and ultimately, having fun out in the garden.

J.) Landscape Design With Woody Ornamentals and Evergreens

Tom deHaas, OSUE Lake Co. Educator, Agricultural and Natural Resources

Do you LOVE your yard and don't know what to do with it? This presentation will address site location of ornamentals and what to consider when planning your landscape. The focus will be on woody and evergreen trees and shrubs.

B.) A Tour of the Chelsea Garden Show and Historic English Gardens

Jeff Griff, Owner Loew's Greenhouse

See the most celebrated garden show in the world through the eyes of a local gardening professional.

E.) Waking Up Your Lawn and Gardens to Spring

Jeff Griff, Owner Loew's Greenhouse

Get your garden off to the best start ever and gain a better understanding of what you need to do to be successful in all your spring gardening efforts. Learn about the tricks and timing, the do's and don'ts, gardening myths and mysteries, planting from asparagus to zinnias, soil prep, mulching and fertilization, and pruning.

H.) Using Native Plants in the Landscape

Natalie Gertz-Young, Education/Information Coordinator, Lake County Soil and Water Conservation District

The average suburban landscape is an ecological desert for our native wildlife. Many non-native landscape plant species are invading our wild areas. Learn ways to help your native ecosystems and have a beautiful landscape with native species.

K.) Succulents are Sexy!

Bill Hendricks, President, Klyn Nurseries, Inc.

Explore the exciting world of cacti and succulents and their amazing rise in popularity. Learn about their diversity and how to care for them in the home and garden and other creative ways to use and display your plants.

C.) The Truth About Butterfly Gardening

David J. Shetlar, Ph.D., OSU Professor Emeritus of Urban Landscape Entomology

Many gardeners plant a variety of plants in hopes of attracting butterflies. Find out how to provide foods for successful butterfly gardening.

F.) Herbs for Pollinator Conservation

Rees and Meghan Davis, Owners of Honey Hollow Herbs, Ashtabula Co. Master Gardeners

Take a tour of which herbs to include in your garden to support and attract pollinators. Learn which herbs attract which pollinators and why. Make a difference by adding some non-native herbs to your garden to provide nectar and pollen sources for bees, butterflies, and birds!

I.) Using the Biological Control Tactic in Home Gardens

David J. Shetlar, Ph.D., OSU Professor Emeritus of Urban Landscape Entomology

The primary key to successful use of biological controls (beneficial insects) is to learn and recognize all their life cycle stages. This session will cover the most common biological controls found in Ohio landscapes.

L.) 20 Plants That Changed the World

Cynthia Druckenbrod, Horticulturist and Entomologist

Have you ever considered how plants affect our lives on a daily basis? This talk will highlight the fascinating stories on how and why 20 amazing plant species became invaluable, instrumental, and sometimes infamous!
